

## Splice cassette + Cover

Art.-No. 53100.1 + 53100.4

### Characteristics:

- For 2 x 12er splice holders (max. 24 arc splices)
- Stackable
- Dimensions (W) x (H) x (D): 155 x 8 x 92 mm
- PU 5 pieces
- 4 Cable entries, one of them angled for fiber routing in areas without space
- Securing elements prevent cable twisting and snap holder for divers splice protectors
- The cassette has a snap-fastening for the cover (Art.-Nr. 53100.4), which is located out of the fiber routing area
- For compatibility to the Telekom cassette single fiber strain reliefs and the usual hinges can be mounted
- Further applications are possible because of the generously cable grommets at the bottom of the cassette

The cover is suitable for the splice cassette and the overlength splice cassette. It is equipped with two clips for secure fastening on the cassette. A labelling field and the holes for mounting hinges are available. Compatibility to the Telekom splice cassette is given. The cover is delivered with a label „Laser radiation“.

RoHS  
compliant
